

Meeting TT-TDCF / ET-DRC : DAYCLI message

TT-TDCF : Task Team on Table Data Code Format

19/04/2021 (14:00 GMT+2 - 15:00 GMT +2)

List of participants

TT-TDCF: Jitsuko HASEGAWA, Sergio Henrique Soares FERREIRA

ET-DRC: William Wright, Denis STUBER

WMO: Peer Hechler, Enrico FUCILE

Presentation of the general specifications for climatology purpose (ET-DRC)

Status and feasibility on those specifications from TT-TDCF

TT-TDCF will discuss technical solutions (Create an associated field / Create another descriptor (0-33-xxx) to allowed the inclusion of other quality information in future) during the newt TT-TDCF meeting this week (20-21 of April 2021)

Dead line decision for ET-DRM to send its conclusion to TT-TDCF

The 15 of May 2021

Necessary review process of proposed BUFR sequence, if any

As it is a response to the WMO assessment (March 2020) of the DAYCLI message, no approval process is needed.

- **Validation process**
 - o Sample data offered by Sergio
 - o **From 20 of April 2021** : "syntax tests" validation by TT-TDCF (internal test)
 - o **15 of May 2021** : ET-DRC provides to TT-TDCF validation on codes table
 - o **18 of May 2021** : code sequence validation completed
 - o **18 of May 2021** : sample data with real data
 - o **mid-May 2021 / mid-June 2021** : Semantic test
 - o **July 2021** : ask focal points and give a 2 month time for feedback for the new BUFR template
 - o **November 2021** : DAYCLI operational over the GTS
